1. Executive summary

TripSheet / FleetQuix is a **working multi-tenant trucking operations platform** deployed to staging and production. The core workflow — **create company** → **invite driver** → **onboard with documents and contract** → **assign dispatch** → **track** → **upload compliance docs** → **run settlements and basic accounting** — is implemented and testable end-to-end.

Key findings

Finding	Detail
Strong foundation	Multi-tenant SaaS, authentication, RBAC, master data, driver lifecycle, dispatch, fleet maintenance, accounting basics, and analytics are production-deployed .
MVP breadth	Approximately 65–70% of PRD functional scope is delivered; approximately 85% of platform/infrastructure work is complete.
Biggest MVP gaps	OCR processing, external load board, real GPS/ELD, automated payroll calculation, push notifications, and dedicated staff (dispatcher/accountant) workspaces.
Ahead of PRD roadmap	Multi-tenant SaaS was listed as Phase 4 (post-MVP) in the PRD but is already built and live .
Quality assurance	Automated chapter test suites (RBAC, auth, tenancy, MDM, drivers) plus 41 Playwright E2E tests passing locally.

One-line client message

Done: A deployable multi-tenant TMS with digital driver onboarding, dispatch, fleet ops, compliance, basic accounting, and reports.

Remaining: Automation layers (OCR, real notifications, payroll engine, load boards, GPS/ELD) and staff-specific UIs.

2. Overall completion scorecard

Category	Complete	Partial	Not started
Platform & SaaS	6	0	0
Authentication & RBAC	2	1	0
Driver management	1	3	2
Dispatch	1	4	1
Load board	0	0	1
Fleet maintenance	1	2	1
Accounting	1	2	3
Document management	1	1	3
Reports	1	1	1
Administration	1	0	0
Notifications	0	2	1
Tracking / GPS / ELD	0	1	2

Legend:  Complete ·  Partial ·  Not started

3. Platform foundation (delivered)

These capabilities were delivered as formal architecture chapters and are **complete, tested, and deployed**.

Chapter	Scope	Status	Verification
Multi-tenant (Phases 1–6)	DB-per-company, auto-provision, tenant routing, super-admin ops, backup/restore	✓	npm run test:tenancy
RBAC (Chapter 2)	~55 permissions, 10 system roles, custom roles, gateway enforcement	✓	npm run test:rbac
Auth (Chapter 4)	Invites, TOTP MFA, sessions, password policy, reset, security events	✓	npm run test:auth:live
MDM (Chapter 5)	Brokers, customers, locations, commodities, ports, CSV I/O	✓	npm run test:mdm
Drivers (Chapter 6)	Lifecycle, qualifications, dispatch gates, equipment, safety/training	✓	npm run test:drivers
Deploy / CI/CD	Staging + production, blue/green, migrations, Docker images	✓	Live environments

Ahead of PRD timeline

The PRD lists **Multi-tenant SaaS** under *Future Roadmap — Phase 4*. This is **already shipped**, including:

- Super-admin company creation with plan selection
- Automatic tenant database provisioning (`fq_tenant_{slug}`)
- Tenant-only runtime routing (shared-DB legacy path removed)
- Tenant ops dashboard (status, errors, schema migrate-all)
- Per-tenant backup and restore runbooks

4. PRD module status

Module 1 — Driver Management

Requirement	Status	Implementation notes
Admin creates driver and sends invite	✓	Drivers tab → invite flow
Secure invitation link (TTL, revoke, regenerate)	✓	Single-use tokens; auth chapter tested
Driver creates password	✓	Onboarding wizard
Document upload	✓	18 document types; Cloudinary storage
All PRD mandatory doc types	⚠	Missing: Passport, Visa, Work Permit, Resume, Road Test, Drug Test (Police Clearance ≈ Criminal Background Check)
Expiry date on upload	✓	Field captured per document

Automated expiry status / alerts	⚠️	Labels exist; no background expiry job
OCR extracted data	❌	Deferred; plan flag only (ocr: true on Enterprise)
Admin verification / approval workflow for docs	❌	Upload only; no formal review queue
Digital contract signing	✅	Driver + admin e-sign (checkbox flow)
Admin HR review → approve → active	✅	Lifecycle: Pending HR Review → Active
Email / SMS on invite	⚠️	SMS simulated without Twilio; email queued (no guaranteed live SMTP)
Wage setup: hourly, per mile, %, salary, per trip	✅	All five pay types in employment contract
Bonus, fuel bonus, detention, layover, etc.	⚠️	Detention/accessorials on load economics; not full wage rule engine
Auto payroll from contract	❌	Explicitly deferred — settlements are manual

Driver dashboard (PRD §9)

Feature	Status
Today's dispatch / current trip	✅
Upcoming trips	✅
Payroll / settlements view	✅
Documents	✅
Vehicle assignment	✅
Contract & wage terms	✅
Notifications	⚠️ In-app only
Messages	⚠️ Admin Messages tab; limited driver UX
Maintenance alerts	⚠️ Via fleet expiry/compliance
Push notifications	❌

Module 2 — Dispatch

Requirement	Status	Implementation notes
Create dispatch (driver, truck, trailer, load)	✅	Full form with broker, commodity, rates, stops
Pickup / drop / commodity / weight / rate / broker	✅	

Compliance gates (license, medical, abstract)	✓	Server-side dispatch-ready enforcement
Cross-border / customs validation	✓	Port of entry + ACE/ACI/PAPS/PARS populate
Send dispatch / notify driver	⚠	Load created; notification hooks; not full push/SMS
Driver accepts dispatch	⚠	Setting <code>driverAcceptanceRequired</code> exists; no driver Accept UI
Trip status lifecycle	⚠	4 statuses: assigned → in_transit → delivered (PRD lists 8+)
GPS tracking	⚠	Simulated map movement (<code>simulateTrack</code> API)
Dispatch document upload (BOL, POD, etc.)	✓	Typed uploads linked to driver/load
Load economics (revenue / cost / margin)	✓	Enterprise feature — margin on load cards

PRD trip statuses vs implemented

PRD status	Implemented equivalent
Assigned	✓ assigned
Accepted	✗ No separate status
En Route Pickup	✗
Loaded	✗
En Route Delivery	⚠ in_transit (combined)
Delivered	✓ delivered
Completed / Closed	✗

Module 3 — Load Board

Requirement	Status
Searchable load board (origin, destination, RPM, broker, date, etc.)	✗
DAT / Truckstop / 123Loadboard integrations	✗
Direct broker API integrations	✗
Book load → auto-create dispatch	✗

Note: Dashboard shows "load board composition" analytics — this is **reporting**, not a booking board. Correctly excluded from PRD MVP scope for automated booking.

Module 4 — Fleet Maintenance

Requirement	Status	Implementation notes
-------------	--------	----------------------

Trucks, trailers, assets	✓	Assets tab
PM / repair schedules	✓	Fleet Ops tab
Service history	✓	Per-asset maintenance records
DVIR	✓	Pre/post trip inspections
Expiry alerts (insurance, plates, permits)	✓	Expiry panel + optional SMS reminder
Mileage tracking	⚠	Via loads/trip sheets; no dedicated odometer feed
Tire management	⚠	Via maintenance types; no dedicated tire module
Reefer-specific tracking	⚠	Equipment types supported; limited reefer workflow
Predictive maintenance	✗	PRD excluded from MVP

Module 5 — Accounting

Requirement	Status	Implementation notes
Driver settlements	✓	Draft → approved → paid
Trip sheets / driver expenses	✓	Sheets tab
Invoices (AR)	✓	Create, status, aging
Bills / vendor payments (AP)	✓	
Chart of accounts	✓	Seed default accounts
Full double-entry journal	✗	COA only
Auto payroll calculation	✗	Wage terms informational
Fuel expense reconciliation	⚠	Via trip expenses + reports
Tax handling	✗	
Export to QuickBooks / accounting software	✗	
Owner payroll	✗	

Plan gating: Accounting tab hidden on Starter plan; gateway returns 403 on accounting routes when `features.accounting === false`.

Module 6 — Document Management

Requirement	Status	Implementation notes
Upload + secure cloud storage	✓	Cloudinary
Typed documents (BOL, POD, permits, border)	✓	
OCR processing	✗	Not implemented

Auto naming	✗	
PDF generation	✗	
Version history	✗	
Compliance artifact registry	✓	Compliance tab
Audit trail on document actions	✓	Audit log

Module 7 — Reports

PRD report type	Status
Revenue / profit / gross margin	✓
Fuel cost	✓
Driver performance	✓
Truck performance	⚠ Via maintenance reports
Dispatch / load profitability	✓
Maintenance report	✓
Payroll / settlements	✓
Invoice aging (AR)	✓
OTP / on-time performance	✓
Broker performance (detailed)	⚠ Partial
Customer performance	⚠ Partial
Mileage	⚠ Via load miles
Idle time	✗
Broker RPM analytics	⚠ Partial

Module 8 — Administration

Requirement	Status	Implementation notes
Super admin (companies, plans, tenant ops)	✓	Super Admin panel
Company profile & settings	✓	Company tab
Branches & departments	✓	
Branding (logo, colors, invoice header)	✓	
User / staff management	✓	Invite with role assignment

Custom roles (permission composition)	✓	Owner-defined roles
API keys	✓	Create once / revoke
Security policies	✓	Password, MFA requirement, IP allowlist
Subscription plans & entitlements	✓	Starter / Professional / Enterprise
Feature flags	✓	Per-plan JSON features
Audit logging	✓	IP, user agent, before/after on new events
Company document vault	✓	Company → Documents

Staff persona UI gap

Role	Backend RBAC	Dedicated UI
Company owner	✓	✓ Full /app (14 tabs)
Dispatcher	✓	✗ Placeholder /workspace
Accountant	✓	✗ Placeholder /workspace
Fleet manager	✓	✗ Placeholder /workspace
HR manager	✓	✗ Placeholder /workspace
Driver	✓	✓ Driver portal

Staff users see: "Workspace coming next — permission-based screens for this role ship in the next RBAC phase."

5. PRD MVP checklist (§22)

Official MVP scope from the PRD with honest implementation verdict:

MVP item (PRD §22)	Verdict	Notes
Authentication	✓	Login, MFA, sessions, reset
Role Management	⚠	Backend complete; staff UI incomplete
Driver Onboarding	✓	Core flow complete
Invite Links	✓	TTL, revoke, regenerate
Digital Contract Signing	✓	Simple e-sign (not DocuSign-level)
Driver Document Upload	✓	18 types
Driver Wage Setup	⚠	Setup yes; auto-calculation no
Dispatch Creation	✓	Full assign-load workflow
Driver Dispatch App	⚠	Responsive web portal , not native app

Document Upload (dispatch)	✓	BOL, POD, border docs, etc.
OCR Processing	✗	Not built despite MVP checkbox
Fleet Maintenance	✓	PM, repair, DVIR, expiry
Accounting Basics	✓	Plan-gated
Reports	✓	Analytics subset
Notifications	⚠	Simulated/queued channels

PRD exclusions (correctly not built)

These were explicitly excluded from MVP and remain **not started** (as expected):

- AI route optimization · AI pricing
- Fuel card integration
- Marketplace
- Customer portal
- Multi-company white label (reseller branding)
- Automated load booking
- ELD integrations
- Real-time GPS hardware integrations
- Predictive maintenance

6. Cross-cutting requirements

Customs documentation (PRD §18)

Item	Status
ACE / ACI / PAPS / PARS port data	✓
Cross-border dispatch validation	✓
Border document upload & storage	✓
eManifest UI	✓
Live CBSA filing	✗ Simulated only

Notifications (PRD §19)

Channel	Status	Notes
Email	⚠	Queued; requires SMTP configuration for production
SMS	⚠	Simulated without Twilio credentials
Push	✗	Not implemented

Supported notification triggers (partial): dispatch assigned, document expiring, maintenance due, invite accepted, security events.

Driver tracking (PRD §15)

Capability	Status
Current location on map	⚠ Simulated
Speed / trip progress	⚠ Simulated
ETA	✅ On load record
Fuel stops / idle time	❌
Geofence events	❌
ELD provider integration	❌
GPS / telematics hardware	❌

Non-functional requirements (PRD §24)

Requirement	Status
Cloud-native architecture	✅ Microservices + Docker
Mobile responsive web	✅
Native driver mobile app	❌
Secure document storage	✅ Cloudinary
Role-based permissions	✅
Audit logging	✅
Multi-language ready	❌
Multi-currency ready	❌
High availability	⚠ Blue/green deploy; not full HA cluster
Scalable to enterprise fleets	✅ Architecture supports
API-first design	✅ REST via gateway

7. Gap matrix (detailed)

ID	PRD reference	Feature	Priority	Status	Effort est.
G-01	§12, MVP	OCR document processing	P0	❌	4–6 weeks
G-02	§19	Production SMS (Twilio)	P0	⚠	1 week

G-03	\$19	Production email (SMTP)	P0	⚠️	1 week
G-04	\$8, \$17	Automated payroll calculation	P0	❌	3–4 weeks
G-05	\$5, \$8	Staff persona workspaces (dispatcher, accountant)	P0	❌	3–4 weeks
G-06	\$10	Driver dispatch accept workflow	P0	⚠️	1–2 weeks
G-07	\$10	Granular trip statuses (8+ states)	P1	⚠️	2 weeks
G-08	\$7	Missing doc types (passport, visa, etc.)	P1	❌	1 week
G-09	\$7	Document expiry background job	P1	❌	1–2 weeks
G-10	\$19	Push notifications	P1	❌	2–3 weeks
G-11	\$24	Native mobile app (driver)	P1	❌	8+ weeks
G-12	\$13	Load board (DAT, Truckstop)	P2	❌	8+ weeks
G-13	\$15	Real GPS / ELD integration	P2	❌	8+ weeks
G-14	\$17	QuickBooks / accounting export	P2	❌	4 weeks
G-15	\$26	Customer portal	P2	❌	6+ weeks
G-16	\$26	White-label / reseller branding	P2	❌	4 weeks
G-17	\$18	Live customs / CBSA filing	P2	❌	Partner-dependent
G-18	\$24	Multi-language / multi-currency	P3	❌	4+ weeks

8. What is client-ready today

The following can be demonstrated and used in production **today** (company owner persona):

1. **Super-admin SaaS** — Create companies, assign plans, monitor tenant health, run schema migrations
2. **Secure login** — MFA, password policy, session management, forgot/reset password
3. **Staff & role management** — Invite users, assign system or custom roles, RBAC enforced on API

- 4. **Master data** — Brokers, customers, locations, commodities, ports; CSV import/export
 - 5. **Driver onboarding** — Invite link → password → documents → contract sign → HR approve
 - 6. **Dispatch** — Assign load with compliance gates, economics, multi-stop, cross-border
 - 7. **Tracking** — Map view with simulated in-transit movement
 - 8. **eManifest** — Cross-border manifest UI (simulated filing)
 - 9. **Fleet maintenance** — PM, repairs, DVIR, asset expiry tracking
 - 10. **Trip sheets** — Driver expense capture
 - 11. **Accounting** — Settlements, invoices, bills, payments, chart of accounts (Professional+ plan)
 - 12. **Compliance** — Document artifacts, audit log, expiry reminders
 - 13. **Reports** — Analytics dashboard (margin, CPM, fuel, OTP, AR aging, profitability)
 - 14. **Company settings** — Branding, branches, API keys, security policies, document vault
-

9. Remaining work (prioritized)

P0 — MVP fidelity (client-visible gaps)

- 1. **OCR pipeline** — Extract reference numbers, dates, weights, amounts from BOL/POD/invoices
- 2. **Production notifications** — Configure Twilio + SMTP for real invite, dispatch, and expiry messages
- 3. **Staff workspaces** — Dispatcher and accountant UIs (RBAC backend already enforces permissions)
- 4. **Driver accept dispatch** — UI + status when `driverAcceptanceRequired` is enabled
- 5. **Production UAT** — Formal sign-off checklist on live production environment

P1 — High value, PRD-aligned

- 6. **Payroll auto-calculation** from contract terms + trip sheet data
- 7. **Document expiry automation** — Scheduled job + proactive admin alerts
- 8. **Additional document types** — Passport, visa, work permit, resume, road test, drug test
- 9. **Granular trip statuses** — Match PRD §10 workflow if required by operations team
- 10. **Native mobile app or PWA** with push for drivers

P2 — Post-MVP integrations (PRD Phase 2)

- 11. Load board integrations (DAT, Truckstop, 123Loadboard)
- 12. Real GPS / ELD telematics partners
- 13. Customer self-service portal
- 14. Fuel card integration
- 15. Accounting software export (QuickBooks)
- 16. White-label reseller branding

P3 — AI & automation (PRD Phase 3+)

- 17. AI dispatch recommendations, payroll validation, maintenance prediction, document classification
-

10. Recommended delivery roadmap

Phase	Timeline	Deliverables	Closes gaps
A — MVP hardening	2–3 weeks	Production UAT, Twilio/SMTP, driver accept flow, dispatcher UI (core tabs)	G-02, G-03, G-05, G-06
B — PRD automation	4–6 weeks	OCR v1, payroll calc v1, doc expiry jobs, missing doc types	G-01, G-04, G-08, G-09

C — Staff & mobile	4–6 weeks	Full staff workspaces, PWA or native driver app, push notifications	G-05, G-10, G-11
D — Integrations	8+ weeks	Load board API, GPS/ELD partner, accounting export	G-12, G-13, G-14

Appendix A — PRD user stories

User story (PRD §21)	Status	Evidence
Fleet owner: drivers onboarded digitally	✓	Invite → onboard → approve lifecycle
Dispatcher: assign loads quickly	✓	Dispatch tab assign-load form
Driver: upload BOL from phone	✓	Responsive driver portal + doc upload
Accountant: payroll calculated automatically	✗	Settlements manual; wage preview only
Maintenance manager: service reminders	✓	Fleet Ops expiry + maintenance alerts

Appendix B — Test & verification evidence

Test suite	Command	Scope
RBAC	cd backend && npm run test:rbac	Permissions, persona gates
RBAC live	npm run test:rbac:live	Ephemeral company provisioning
Multi-tenant	npm run test:tenancy --prefix backend/gateway	Tenant isolation
Auth	npm run test:auth:live --prefix backend/gateway	Invites, sessions, MFA
MDM	cd backend && npm run test:mdm	Master data CRUD, merge
Drivers	cd backend && npm run test:drivers	Lifecycle, dispatch-ready
E2E (browser)	cd frontend && npm run test:e2e	41 Playwright tests

Manual enterprise features: [TESTING-ENTERPRISE-FEATURES.md](#)

Appendix C — Environment URLs & accounts

Environment	URL
Staging	https://staging.tripsheet.187.124.55.20.sslip.io/
Production	https://tripsheet.187.124.55.20.sslip.io/

Account	Email	Password	Role
Super admin	admin@tripsheet.io	admin123	Platform admin

MKX owner	admin@mkx.ca	mkx123	Company owner
MKX driver	divyam@mkx.ca	driver123	Driver portal
